SUMMARY

AWS Certified Cloud Practitioner (CLF-C02) and BCA graduate specializing in serverless, event-driven backend systems on AWS. Independently built and deployed four cloud applications using Lambda, SQS, DynamoDB, API Gateway, and Terraform – stress-tested up to **21,000 concurrent requests**. Proficient in Python backend development, distributed systems design, and REST API architecture. Seeking a fresher cloud or backend engineering role; open to relocation.

EDUCATION

Banasthali Vidyapith <i>Bachelor of Computer Applications (BCA) – CGPA: 8.15/10.0</i>	Rajasthan, India May 2026
Navy Children School <i>Senior Secondary (12th): 86% Secondary (10th): 88%</i>	Delhi, India May 2023

TECHNICAL SKILLS

Cloud (AWS): Lambda, SQS, DynamoDB, S3, SNS, IAM, API Gateway, CloudWatch
Infrastructure & DevOps: Terraform (IaC), Docker, GitHub Actions (CI/CD), Linux, Git
Languages & Frameworks: Python (FastAPI, Flask, Boto3), Next.js, Redis, SQL
Core Competencies: Serverless Computing, Event-Driven Architecture, Distributed Systems, Concurrency Control, REST API Design, Load Testing (Locust)

TECHNICAL PROJECTS

- Flux-Order: High-Concurrency Ticketing Engine** | Python, Flask, Redis, AWS SQS, DynamoDB, Next.js | [Live Demo](#) Dec 2025
- Stress-tested the system against **21,000 simulated concurrent users** using Locust with zero server crashes, zero data corruption, and exactly one successful transaction per item recorded in DynamoDB.
 - Eliminated double-booking race conditions by implementing Redis Distributed Mutex Locks (SET NX EX), enforcing atomic seat reservation and preventing overselling across all competing workers.
 - Built an idempotent SQS consumer with DynamoDB conditional writes to guarantee exactly-once order processing and prevent duplicate entries across all retry cycles.
- Bill-E: Serverless Audit Pipeline** | AWS Lambda, SQS, S3, DynamoDB, Terraform, Python, Next.js | [Live Demo](#) Nov 2025
- Provisioned a zero-idle-cost ingestion pipeline (S3 → SQS → Lambda) via Terraform IaC with 3-state lifecycle tracking (Queued → Processing → Analyzed) surfaced on a real-time Next.js dashboard.
 - Developed a heuristic risk-scoring engine inside Lambda to parse OCR-extracted receipt text, assigning dynamic fraud scores (0–100) and triggering automated SNS email alerts for high-risk events.
 - Implemented graceful Lambda degradation via a 25-second urllib timeout to intercept OCR API hangs before AWS's execution limit, writing structured error states to DynamoDB and eliminating silent failures.
- Vibe-Check: Serverless Sentiment Analysis API** | AWS Lambda, API Gateway, DynamoDB, SNS, Python Oct 2025
- Deployed a public REST API via AWS API Gateway backed by a Python Lambda function to classify customer feedback sentiment and log all requests to DynamoDB in real time.
 - Implemented a cost-optimized rule-based classification engine (zero ML inference cost) with automated SNS crisis alerts for negative sentiment, achieving sub-2-second end-to-end notification latency; full infrastructure provisioned via Boto3 scripts.
- Sentinel: Network Intrusion Detection System** | Python, FastAPI, Scapy, ML Jan 2026 – Apr 2026
- Collaborative academic project: trained an anomaly detection model on the NSL-KDD benchmark dataset and built a real-time packet capture backend using Python and Scapy for threat classification.
 - Developed a low-latency FastAPI REST interface to expose live threat metrics and alert feeds to a centralized security monitoring dashboard.

EXPERIENCE & LEADERSHIP

Mayukh Tech Fest – Banasthali Vidyapith <i>Workshop Vertical Lead, Core Organizing Team</i>	Rajasthan, India Annual Fest, 2025 & 2026
– Co-led the Workshop Vertical for two annual festival cycles, generating Rs. 1,32,126 in paid registration revenue and serving 500+ attendees per edition. – Owned full-stack event operations: speaker coordination, venue permissions, UPI/QR-based finance tracking, registration systems, and live workshop execution – managing sub-coordinators and volunteers throughout.	

CERTIFICATIONS & LANGUAGES

Certifications: [AWS Certified Cloud Practitioner \(CLF-C02\)](#) – Amazon Web Services (2025) | [Introduction to Generative AI](#) – Google Cloud (2026)
Languages: English (Fluent), Hindi (Native), French (Diploma – Banasthali Vidyapith)
